## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 in Figures 1-8, and 12, Species 2 in Figure 9, Species 3 in Figure 10, Species 4 in Figure 11, Species 5 in Figure 13-16, and Species 6 in Figure 7.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species 1 in claims 1-6, 10-14, 17-23, 27-31 and 34, Species 2 in claims 7 and 24, Species 3 in claims 8, 15, 25, 32, Species 5 in claims 9, 16, 26 and 33, and Species 6 in claims 35-37.

Art Unit: 3634

The following claim(s) are generic: None.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species 1 does not include the clamping member integrally formed with the molded material as Species 2 does. Species 3 is different in that it is not integrally formed but a separate piece that is embedded into the material. Species 5 includes a rigid member that is embedded into the molded material with an aperture. Species 6 also includes a rigid member but with no aperture.

4. A telephone call was made to Pamela Ruschau on 1/5/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

5.
